**GTL Energy, Ltd.**  
**GTLE Dakota Plant 1 LLC Coal Beneficiation Plant**

**Conditions Added to the GTL Energy Air Pollution Control Permit to Construct**

Y. **Fugitive Dust Control:** The owner/operator shall control fugitive dust as follows:

1. Water unpaved on-site haul roads as often as necessary to control fugitive particulate matter emissions.
2. Limit vehicle speeds on on-site roads to 20 miles per hour.
3. All coal stockpiles shall be located inside of the buildings on the GTL Energy property.

The need for on-site watering shall generally be based on the following factors: visual observations, surface conditions, ambient temperature, recent precipitation, humidity, wind conditions and traffic volume.

Z. **Coal Analysis:** The owner/operator shall submit a coal analysis to the Department for each coal mine prior to processing coal from the mine. The analysis shall be submitted to the Department at least 30 days prior to the processing of the coal. The analysis shall include the following:

1. The name and location of the coal mine.
2. The concentration (in parts per million, by weight) in the coal of the following: arsenic, beryllium, chromium, mercury and uranium.
